

# Individual Mini Project #submission 1

## What is the web application topic that you want to do?

### Accommodation Review Website

The Accommodation Review site I provide offers a platform for users to share their experiences and opinions about various aspects of their stay, including service quality, cleanliness, comfort, convenience, location, and other amenities. By sharing this information, travelers can make more informed decisions about their accommodation choices and avoid any potential issues or surprises. Reading through the reviews and ratings posted by other users can provide valuable insights and a better understanding of what to expect before making a reservation.

## What is the core feature in detail?

1. **Search functionality** The website will have a search bar that allows users to search for specific accommodations or browse through categories such as location, type of accommodation, price range, etc.
2. **Review submission** The website will have a form that allows users to submit reviews, including a rating system and the ability to upload photos.
3. **Moderation** The website will have a system in place to moderate reviews to prevent spam, fake reviews, or inappropriate content.
4. **Sorting and filtering** The website will allow users to sort and filter reviews based on different criteria such as date, rating, relevance, etc.
5. **User profiles** The website will have user profiles that allow users to view their own reviews, activity, and interactions with other users.
6. **Social sharing** The website will have social sharing buttons that allow users to share reviews on social media platforms such as Facebook, Twitter, or Instagram.
7. **Mobile responsiveness** The website will be mobile-friendly and accessible on different devices such as smartphones, tablets, or laptops.
